SRNT-E CONFERENCE

21-23 SEPT 2026

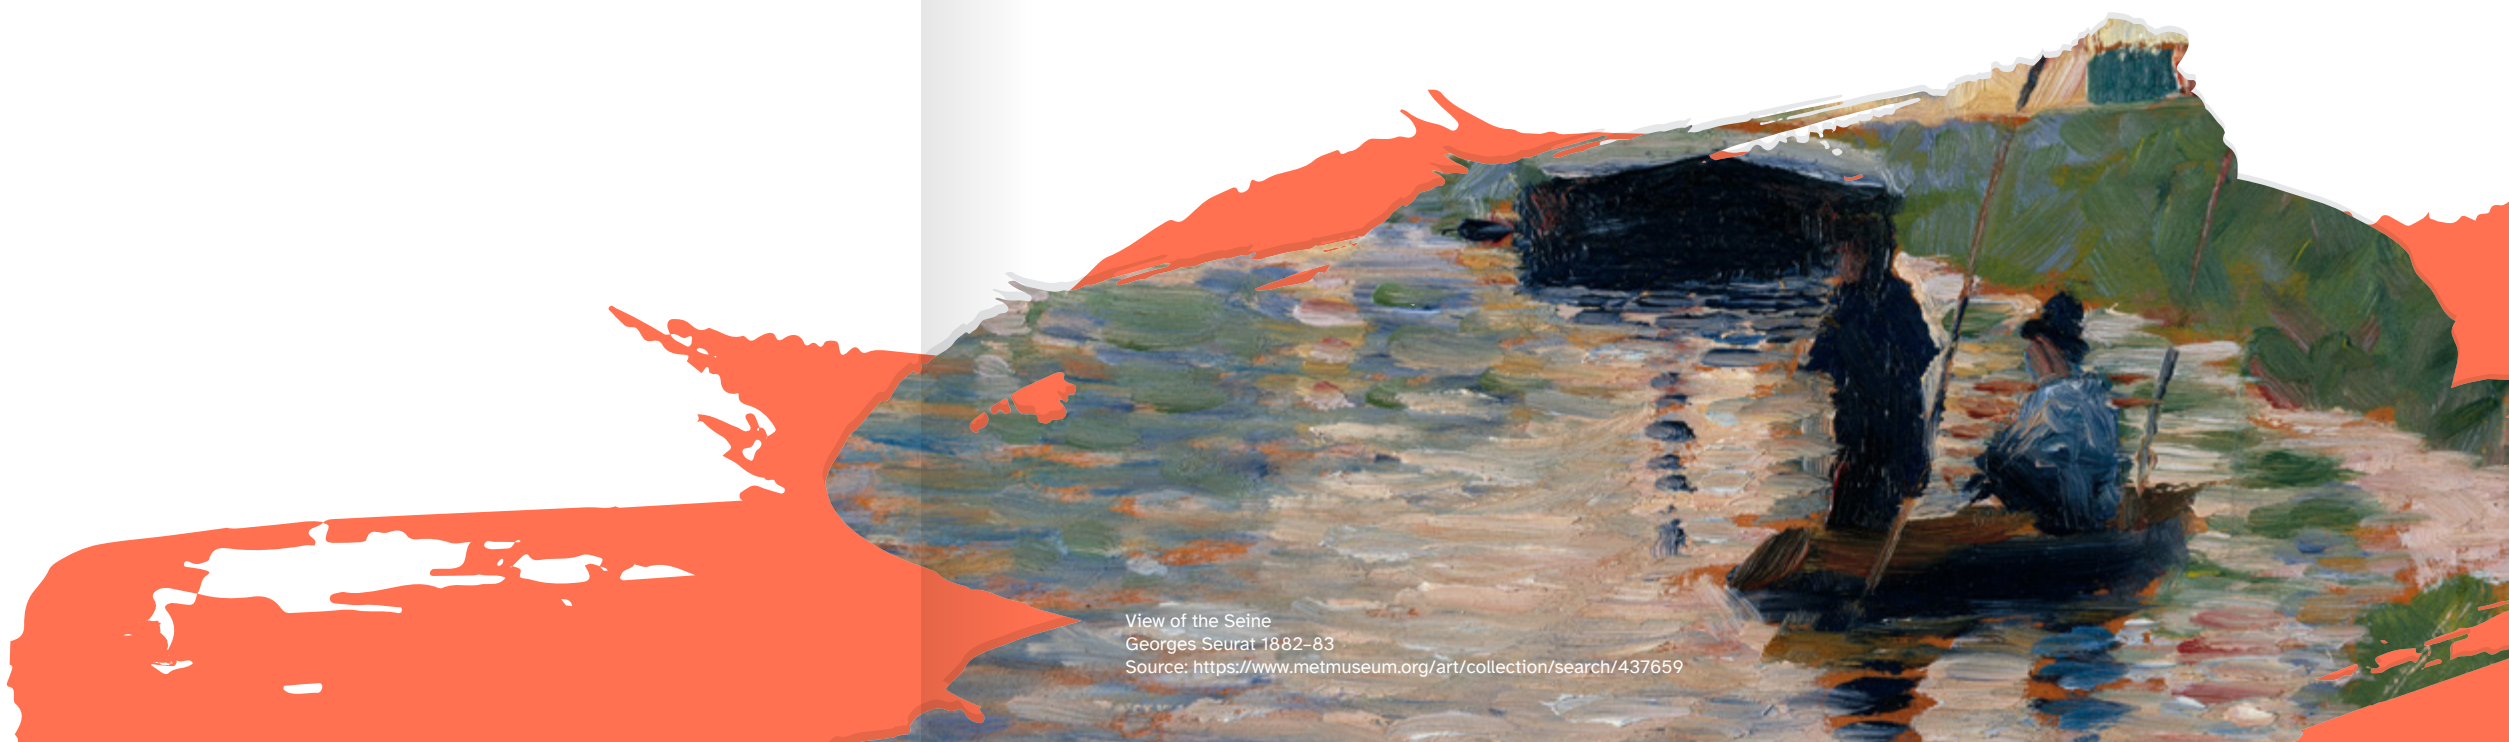

<https://srnt-e.org/conference/2026-annual-srnt-e-conference/overview>

SRNT-E CONFERENCE • 21-23 SEPT 2026

Advancing the tobacco endgame:
science, policy and equity
for a healthier future.

A reproduction of the painting "View of the Seine" by Georges Seurat, showing two figures in a small boat on the river. The painting is characterized by its pointillist style, with visible brushstrokes and a vibrant color palette. It is partially obscured by a large, abstract orange and white graphic element in the foreground.

View of the Seine
Georges Seurat 1882-83

The Grand Palais des Champs-Élysées

Welcome Addresses

Welcome from the SRNT-E President

Amanda Farley

Department of Applied Health Sciences, University of Birmingham UK

We are delighted to welcome you to the 2026 Conference of the European Chapter of the Society for Research on Nicotine and Tobacco (SRNT-E) at the Cordeliers Campus, Sorbonne University, Paris!

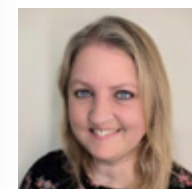

Although progress has been made in tackling tobacco across the world, there is still much left to do. In the Europe region, the tobacco epidemic continues to rage with around 1.1 million tobacco related deaths occurring each year. In Europe and worldwide, millions are affected by smoking related illnesses as well as the impact of buying tobacco on personal finances. The health impacts of tobacco use continue to weigh heavy on healthcare systems and economies, and there is also growing recognition of the detrimental effect of tobacco production on the environment. Whilst smoking prevalence is reducing in some populations overall, rates remain high in specific groups, and often the most vulnerable in society. Despite progress, the need to understand and tackle the challenges with nicotine and tobacco in Europe and across the world remains urgent.

This year's conference will bring together people from around 25 countries across Europe and beyond who share a commitment to tackling the devastating harms caused by tobacco use and of exploring key questions around novel nicotine products. Under the theme "Advancing the Tobacco Endgame: Science, Policy and Equity for a Healthier Future", we will explore the latest evidence spanning basic science, clinical research, public health and policy. We will meet some of the most difficult questions in the field respectfully and head on, including opening the conference with a debate on what the endgame should aim for – a smokefree generation only, or a smokefree and nicotine free generation. We hope this will be the start of important conversations across the conference.

We have had a record response to our call for abstracts for this meeting, and we are looking forward to an engaging programme reflecting the breadth and depth of current research in the field of nicotine and tobacco. Alongside outstanding keynote speakers, symposia, oral presentations, posters and preconference workshops, there will be many opportunities for networking and building new collaborations. We hope you will join us for our evening reception at the Cordeliers Campus, conference dinner at Le Train Bleu at the Gare de Lyon and have time to explore Paris too. As one of Europe's centres of culture and science, Paris is a great location for exchanging ideas, challenging assumptions and building partnerships that will shape the future of nicotine and tobacco research.

Whether you are a long-standing member of the SRNT-E community or attending for the first time, we hope you will find the conference welcoming and rewarding.

Thank you for being part of our community and for the work you do to improve health through research, policy and practice.

Welcome to Paris!

Amanda Farley, SRNT-E President

On behalf of the SRNT-E Board

The Louvre Pyramid (Pyramide du Louvre)

Welcome Addresses

Welcome from the Chair of the Scientific Committee

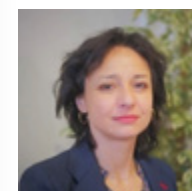

Maria Melchior

Department of Social Epidemiology, Mental Health and Addiction at Sorbonne Public Health Institute

It is a great pleasure and honor for all of us at in the Department of Social Epidemiology, Mental Health and Addiction at Sorbonne Public Health, to host this year's SRNT-E Conference in Paris - the first time the meeting will be held in France!

For many years France was one of the European countries where tobacco smoking rates were high - for the last ten years, with the implementation of ambitious smoking control policies, smoking rates have been significantly reduced, particularly in adolescents and young people, giving hope to policy makers, clinicians and anti-smoking advocates that what seemed entirely impossible is now in our reach - a smoke-free generation. However, new challenges are ahead - widening social inequalities in smoking, the use and misuse of e-cigarettes, the emergence of new nicotine products which are not necessarily covered by existing legal and policy frameworks. While it may seem that we have reached the tobacco end game, there is still much to be understood and investigated to make sure that the benefits of smoking control policies are widespread and sustainable.

My colleagues and myself very much look forward to rich conversations about tobacco use with participants from Europe and beyond, which hosting the SRNT-E will make possible. We are very grateful to the National Cancer Institute (INCA) and Sorbonne Université, for support in organizing this meeting.

Bienvenu à Paris!

Maria Melchior, Chair of the Scientific Committee

On behalf of the Scientific Committee and of the Organizing Committee

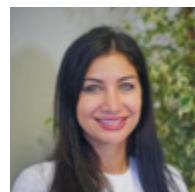

Tour de l'Horloge (Clock Tower) of the Conciergerie

Chairs

Scientific Program Committee (SPC)
Senior Researcher
Maria MELCHIOR
Department of Social Epidemiology, Mental Health and Substance Use (ESSMA)
Pierre Louis Institute for Epidemiology and Public Health UMR-S 1136 | Inserm, Sorbonne Université

Local Organising Committee (LOC)
Administrative manager and coordinator of ESSMA team
Mays KABAKIBI
Department of Social Epidemiology, Mental Health and Substance Use (ESSMA)
Pierre Louis Institute for Epidemiology and Public Health, UMR-S 1136 | Inserm, Sorbonne Université

Scientific Committee

Maria MELCHIOR (chair)
Senior Researcher
Department of Social Epidemiology, Mental Health and Substance Use (ESSMA), Pierre Louis Institute for Epidemiology and Public Health UMR-S 1136 | Inserm, Sorbonne Université

Amanda FARLEY (Conference Chair)
Associate Professor
Department of Applied Health Sciences, University of Birmingham, UK

Karine GALLOPEL-MORVAN
Professor of Social Marketing - Honorary Professor at the University of Stirling, Scotland
EHESP School of Public Health, Research Lab ARENES (UMR CNRS 6051) & RSMS INSERM U1309

Łukasz BALWICKI
Associate professor
Division of Public Health and Social Medicine, Medical University of Gdansk, Poland

Melanie BOECKMANN
Professor in Global Health
Department of Global Health, Institute for Public Health and Nursing Research, University of Bremen, Germany

Viêt NGUYEN THANH
Head of Addiction Unit
Health Promotion and prevention division, Santé Publique France

Local Organising Committee

Mays KABAKIBI (chair)
Administrative manager and coordinator of ESSMA team
Department of Social Epidemiology, Mental Health and Substance Use (ESSMA), Pierre Louis Institute for Epidemiology and Public Health, UMR-S 1136 | Inserm, Sorbonne Université

Marie-Noel ZAYAT
Department of Social Epidemiology, Mental Health and Substance Use (ESSMA), Pierre Louis Institute for Epidemiology and Public Health, UMR-S 1136 | Inserm, Sorbonne Université

Doctoral and early career researchers
Department of Social Epidemiology, Mental Health and Substance Use (ESSMA), Pierre Louis Institute for Epidemiology and Public Health, UMR-S 1136 | Inserm, Sorbonne Université

Professional conference organiser

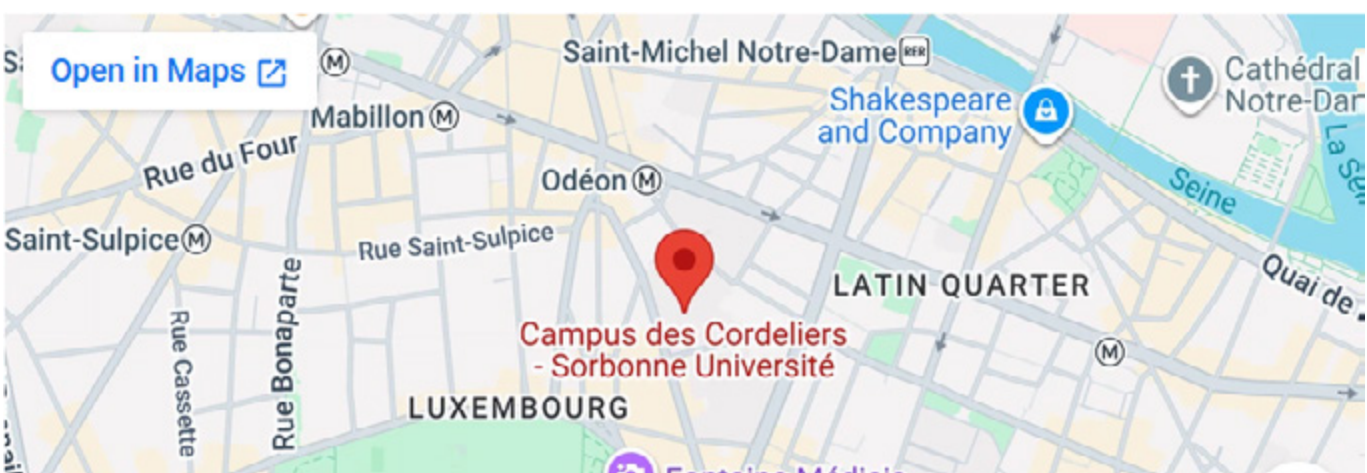

Conference Venue

Sorbonne University is a multidisciplinary, research-intensive, world-class university. Located in the heart of Paris, with a regional presence, it is committed to the success of its students and to meeting the scientific challenges of the 21st century. Through the strength of its 53,000 students, 7,100 academic researchers and partner researchers, and 5,000 administrative and technical staff, Sorbonne University promotes diversity, creativity, innovation and openness to the world.

Conference Location

The conference will be held at the Cordeliers campus of the Sorbonne University in Paris.

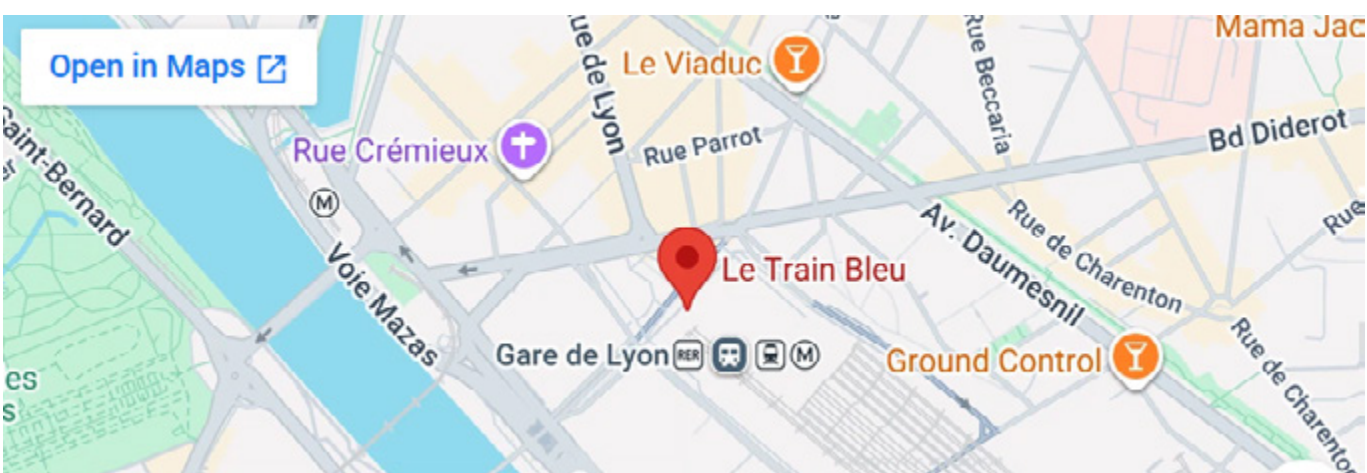

Conference Welcome Reception Location

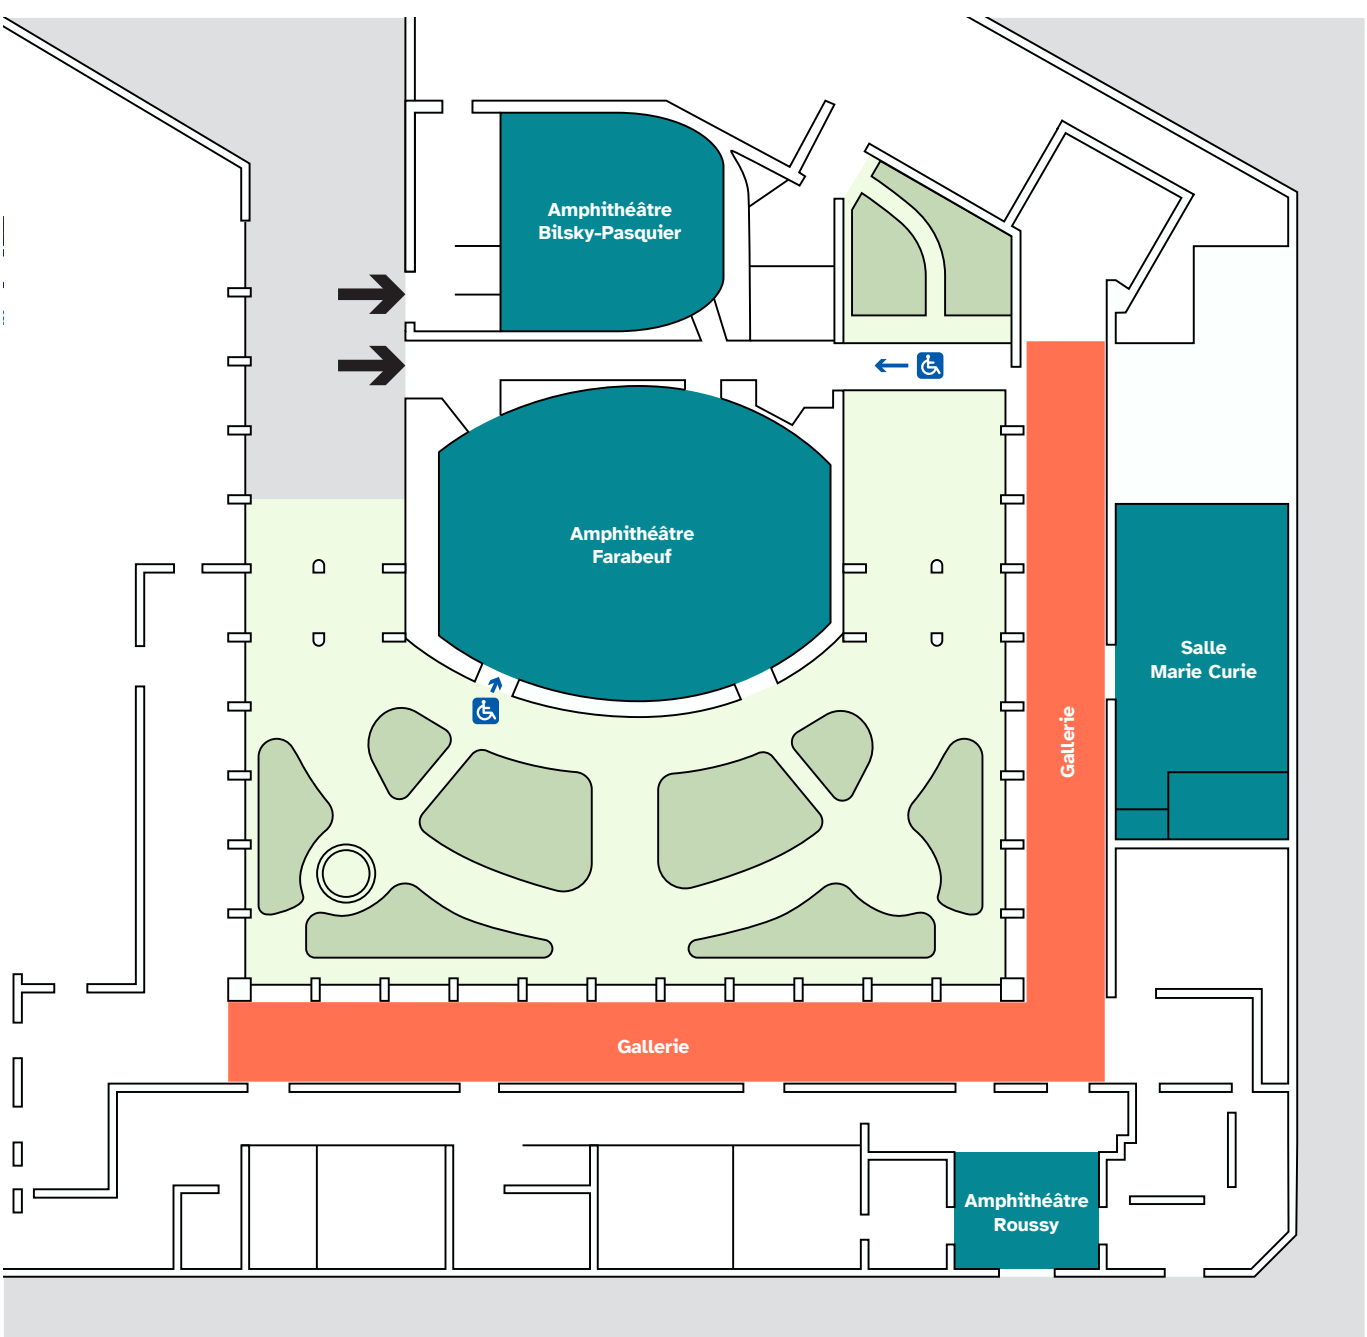

The welcome reception will take place at the end of the first conference day, on **21 September 2026**, at the Cordeliers Campus of Sorbonne University in Paris.

Conference Dinner Location

The conference dinner will be held on the evening of the **22nd September 19:00** at **“Le Train Bleu”**. This traditionally French Gourmet restaurant is located on the 1st floor of the Gare de Lyon.

Conference Floor Plan

Arc de Triomphe

Pre-conference Workshops

Pre-conference workshops will run from 10.30 - 12pm on Monday 21st September. These workshops are available **free of charge**. An option to register for the workshops will be available during registration for the conference.

Career Paths in Tobacco & Nicotine Research: Insights and Advice for Early Career Researchers

Presenters: Simon Ducarroz, Lukasz Balwicki, Janet Hoek, Felix Naughton, Florence Cousson-Gelie

This workshop is organised by REFERTab at the invitation of SRNT-Europe. It targets early career researchers (ECRs) working in tobacco and nicotine research. The session offers a structured space for ECRs engage with senior researchers on career trajectories, professional challenges, and key decisions in the field.

Tobacco Research with Inclusion Health Populations: What Works, What Doesn't, and What Next?

Presenters: Caitlin Notley, Anna Varley, Vera Buss, Zoe Swithenbank, Nicola Lindson, Amanda Farley

Populations defined as 'inclusion health' (e.g., people experiencing homelessness, substance use dependencies, vulnerable migrants) face extreme social exclusion and as a result their smoking is not widely recorded, prioritised or treated. Despite high rates of smoking (up to 80%), these individuals remain substantially underrepresented in the tobacco research literature within Europe, and evidence regarding effective cessation interventions tailored to their circumstances is limited. Furthermore, methodological standards commonly employed to test smoking cessation interventions, including study designs and outcome measures, may be incompatible with the realities of research in this context and be limited in their capacity to measure the impact of interventions. The workshop comprises three structured components. First, researcher-led presentations will provide critical, reflexive accounts of empirical work undertaken with inclusion health groups, foregrounding both methodological innovations and limitations. Second, facilitated breakout discussions will afford participants the opportunity to interrogate these findings, contribute complementary perspectives, and identify cross-cutting methodological and ethical tensions. Third, a collaborative plenary will synthesise emergent themes and co-develop a structured action plan delineating priority research question, recommended methodological frameworks, and strategies for embedding meaningful public and patient involvement throughout the research lifecycle.

Optimization of tobacco interventions via the multiphase optimization strategy (MOST): An informal introduction

Presenters: Linda Collins, Megan Piper

Intervention optimization via the multiphase optimization strategy (MOST) enables the investigator to look inside the "black box" and develop an intervention that strikes a strategic balance of effectiveness, affordability, scalability, and efficiency. Although the tobacco field has been a leader in applications of intervention optimization, many behavioral scientists working in tobacco have not yet considered optimizing the interventions they are developing. In this workshop Linda M. Collins (New York University, USA) and Megan Piper (University of Wisconsin, USA) will offer an informal introduction to intervention optimization, with the aim of helping attendees see how intervention optimization can further tobacco control science. We will start with a brief introduction to MOST and an example of intervention optimization in tobacco research. The rest of the time will be spent in open discussion of the intervention optimization concept and how it can further the research agendas of attendees.

Keynote Speakers

Dr. Stéphanie Caillé-Garnier

Research Director at the French National Centre for Scientific Research (CNRS) and Institute for Cognitive and Integrative Neurosciences of Aquitaine, University of Bordeaux.

Keynote title: **Not All Brains Are Equal: The Neuroscience of Nicotine Vulnerability**

Dr. Caillé-Garnier obtained her doctorate in Neurosciences and Neuropharmacology from the University of Bordeaux in 2000. Upon joining the CNRS in 2005, the researcher’s primary focus was on the consequences of chronic drug exposure in rodents, with a particular emphasis on nicotine, opioids, and the endocannabinoid system. Subsequently, she shifted the focus of her research to the investigation of predictive factors associated with vulnerability to addictive behaviors. As a Principal Investigator (PI) or co-investigator on several university and national agency funding projects, she elucidated the role of interindividual differences, whether attributable to sex differences, cognitive or emotional profiles, in the expression of vulnerability to drug of abuse.

Beyond her academic research, Dr. Caillé-Garnier has served as a national and international expert on public health and regulatory matters. Since 2017, she has contributed as a scientific expert to ANSES (French Agency for Food, Environmental and Occupational Health & Safety) in the working group on tobacco and vaping products. Furthermore, she was a key contributor to the European “Joint Action on Tobacco Control” from 2017 to 2020, where she helped shape science-based policy recommendations.

VISIT WEBSITE

Luk Joossens

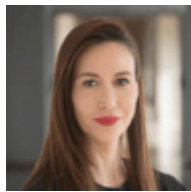

Senior Policy Advisor, Smoke Free Partnership, Brussels, Belgium

Keynote Title: **Reflections on 50 years of tobacco control in Europe**

Luk Joossens obtained a Licence de sociology, KU Leuven, Belgium, March 1972 and Maîtrise en sociologie, Sorbonne, Paris, November 1972. Since then, for almost 50 years he has contributed to the different aspects of tobacco control, such as the eight editions of the Tobacco Control Scale (2006-2026), passive smoking, advertising, labelling, taxes, smuggling (1995-2025), tracking and tracing, tobacco industry tactics, Belgian and EU tobacco control policy, FCTC, Protocol to eliminate illicit trade in tobacco products.

Luk Joossens worked closely together with consumer organisations (1973-2003), Europe against Cancer programme (1988-1995), International Union against Cancer (strategic leader 2006-2009), European Cancer Leagues (1995-2020), Belgian Foundation against Cancer (2003-2016). Framework Convention Alliance (2007-2012), Smoke Free Partnership (2022-2026). He advised extensively international bodies on tobacco control such as the World Health Organization (from 1990 to 2025), the World Bank, The European Commission and the FCTC secretariat. In 2006, he received the American Cancer Society “Luther Terry Award” for Outstanding Individual Leadership in Tobacco Control and in 2015 the World Health Organization Director-General’s Special Recognition of Contribution to Global Tobacco Control.

VISIT WEBSITE

Dr Cristina Martínez

Head of Cancer Prevention Programme and Tobacco Control Unit at the Catalan Institute of Oncology, University of Barcelona Associate Lecturer, Faculty of Nursing, University of Barcelona

Keynote title: **Why Evidence Is Not Enough: Making Smoking Cessation Happen in Hospital Care**

Dr. Martínez is a senior researcher in tobacco control and implementation science. Her main areas of research include the evaluation of tobacco control policies in health care services, by assessing the impact of smoke-free policies and evaluating the effectiveness of smoking cessation and training programs. She is currently developing and testing the effectiveness of tobacco cessation training programs among healthcare professional students, and she is also evaluating policy interventions to promote smoking cessation among vulnerable persons (mentally ill or with substance abuse disorders) and promoting smoke-free environments in private settings (homes).

VISIT WEBSITE

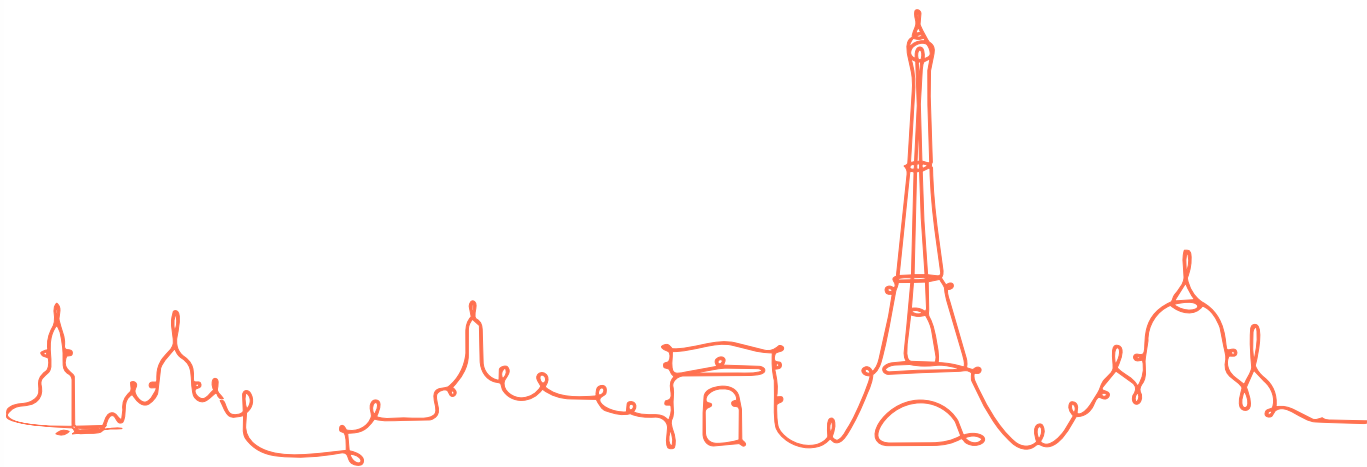

Dr Tessa Langley

Associate Professor in Public Health Economics and Evaluation, Nottingham Centre for Public Health and Epidemiology, University of Nottingham, UK

Keynote title: **Beyond Health: The Economic and Equity Implications of Tobacco and Vaping Policies**

Dr Tessa Langley is an Associate Professor in Public Health Economics and Evaluation. She completed an Honours degree in Economics and Economic History at the University of Warwick, followed by a Master’s in Public Health at the University of Nottingham, before continuing to a research role, PhD and subsequently an academic position at the University of Nottingham. She specialises in public health economics and evaluation, with a focus on tobacco control and e-cigarette policy. She has led numerous studies evaluating tobacco control policies in the UK and assessing the economic impact of tobacco use, highlighting how reducing smoking rates not only improves health but also helps reduce economic inequalities. In addition to her research, Dr Langley is a member of the Royal College of Physicians’ Tobacco Advisory Group, contributing to regular evidence reviews on tobacco and nicotine policy, and serves as Deputy Editor of Nicotine & Tobacco Research.

	Amphithéâtre Bilsky-Pasquier	Amphithéâtre Roussy	Amphithéâtre Farabeuf
11:15–12:00	Coffee break / Poster session 2		
12:00–13:15	Oral presentations Mental Health and Tobacco/Nicotine Use: Risk Factors, Patterns, and Cessation <i>Chair: Stephanie Klosterhalfen</i> Preferences and perceptions of various forms of smoking cessation support among people experiencing serious mental illness: A scoping review <i>Germaine Lai</i> Childhood Sexual Violence and Adult Smoking: Data from a large French study <i>Aicha Mouchidi</i> Tobacco Use and Psychological Distress Among LGBTQ+ U.S. Adults <i>Amelia Blankenau</i> Psychological Distress and Tobacco/Nicotine Use Patterns Among US Adolescents: Cross-Sectional Evidence from the National Youth Tobacco Survey 2023–2025 <i>Siyuan Fan</i> The longitudinal relationship between e-cigarette use and mental health outcomes: a systematic review and meta-analysis <i>Shiying Jia</i>	Oral presentations Beyond standard care: new treatments for smoking cessation <i>Chair: Floor Van den Brand</i> Combined brain PET imaging and proteomics in a mouse model of tobacco-smoke exposure reveal the region-specific effects of NFL-102 on neuroimmune and signaling pathways <i>Nicolas Tournier</i> Glucagon-Like Peptide-1 receptor agonists (GLP-1s) for treatment of tobacco and alcohol dependence: a systematic review and meta-analysis of RCTs and experiments <i>Gemma Taylor</i> Does tailoring improve smoking cessation? A systematic review and meta-analysis of tailored print and digital smoking cessation materials <i>Yan Yee Lee</i> Identifying promising smoking cessation ads for adults who smoke menthol cigarettes <i>Mayank Sakhuja</i> Non-invasive brain stimulation for treating nicotine dependence: findings from clinical trials <i>Laurie Zawertailo</i>	Symposium Nicotine pouches: who uses them, who do adverts target and reach, and do they help people quit? <i>Discussant: Katie East</i> Oral nicotine pouch use in Great Britain: a repeat cross-sectional study, 2020–25 <i>Harry Tattan-Birch</i> Young men see nicotine pouch adverts 10 times more often: Advertiser targeting and algorithmic reach on Meta social media platforms in the UK <i>Kenneth Sun</i> Oral nicotine pouches for harm reduction: current evidence, gaps, and emerging data from a Cochrane systematic review <i>Nicola Lindson</i> Nicotine pouch use in smoking quit attempts: real-world evidence from Great Britain <i>Sarah Jackson</i>
13:15–14:10	Lunch /Hang posters for session 3 Annual General Meeting Amphithéâtre Bilsky - Pasquier		

Tuesday, 22nd September, 2026

14:15–15:05	Keynote lecture Amphithéâtre Farabeuf Luk Joossens <i>Chair: Lukasz Balwicki</i> <i>Keynote title: Reflections on 50 years of tobacco control in Europe</i>
15:15–16:00	Coffee break / Poster session 3

Arc de Triomphe

Tuesday, 22nd September, 2026

	Amphithéâtre Bilsky-Pasquier	Amphithéâtre Roussy	Amphithéâtre Farabeuf
16:00–17:15	Oral presentations Youth Perspectives on Tobacco and Nicotine Use <i>Chair: Maria Melchior</i> Who's to blame? Adolescents' perceptions of responsibility for tobacco and nicotine use – a mixed-method FRESHAIR4Life study in Greece, Pakistan, Kyrgyzstan and Romania <i>Charlotte Hoffman</i> Young people's perspectives on e-cigarette access and policy: a qualitative study in Sheffield, England <i>Calum Lewis</i> Reframing risk: A vignette-guided qualitative study of nicotine vaping perceptions, decisions, and messaging preferences in priority Australian youth <i>Joshua Trigg</i> Young people's perceptions and experiences of the UK disposable vapes ban: a qualitative interview study <i>Nikki Kempster Rowston</i> Do the Correlates of Adolescent Nicotine Vaping in the United States Change After 2020? A Machine-Learning-Based Approach <i>Siyang Ni</i>	Oral presentations Illicit Tobacco Trade: Policy, Markets, and Enforcement <i>Chair: Viet Nguyen Thanh</i> Cost, connections, and compromises: A qualitative analysis of illicit tobacco use in Aotearoa New Zealand <i>Janek Hoek</i> Strengthening supply chain control of the illicit tobacco trade in Australia: A policy coherence analysis against the Protocol to Eliminate Illicit Trade in Tobacco Products <i>Isabel Meciar</i> Trends and correlates of purchasing illicitly traded tobacco: Findings from the 2016-2024 International Tobacco Control Four Country Smoking and Vaping Surveys <i>Coral Gartner</i> Do tobacco control policies drive illicit tobacco trade? A systematic review <i>Isabel Meciar</i> "It was just like boom": Exploring the 'crime cascade' of illicit tobacco in Australia through the experience of franchise tobacconists <i>Coral Gartner</i>	Symposium Saving Lives or Winning Arguments? Rebuilding Productive Dialogue in Tobacco Research <i>Discussant: Hayden McRobbie</i> Two Debates, One Crisis: Mapping the Evidence Landscape in Tobacco Research <i>Jean-Francois Etter</i> Left Behind: What Polarisation in Tobacco Research Costs the People Who Need Us Most <i>Sharon Cox</i> Beyond the Impasse: What Better Disagreement could Look Like in Tobacco Research <i>Caitlin Notley</i>
19:00–22:00	Conference dinner Le Train Bleu		

POSTER SESSION 2

Tuesday 22nd 11:15 – 12:00

Cloisters gallery

Poster number	Abstract number	Title	Presenter
Basic science/pre-clinical			
P2 - 2	#282	Progress Update: Interlaboratory study to determine the repeatability and reproducibility of nicotine and total particulate matter emissions in a variety of newer tobacco products	Marielle Brinkman
P2 - 3	#152	Responses to nicotine reduction as a function of menthol cigarette availability in a laboratory clinical trial: Differences across sexual and gender identity in young adults who smoke	Amy Cohn
P2 - 4	#313	Day-Level Associations Between Nicotine/Tobacco Use and Alcohol and/or Cannabis Co-Use Among Young Adults	Holly Boyle
P2 - 5	#305	1,8-Cineole Inhibits Hepatic Nicotine Metabolism In Vivo: Pre-Clinical Validation of a Safe Herbal Adjunct for Smoking Reduction	Leteris Zacharia
P2 - 6	#302	Beyond Secondhand Smoke: Estimates of Recent Harms from Other People's Tobacco Use in the United States	Isaiah Niles Zoschke
E-cigarettes			
P2 - 7	#242	Household, Community, and Financial Childhood Adversity and Home ECigarette Aerosol Exposure in U.S. School-Aged Children	Ashley L. Merianos
P2 - 8	#244	Patterns of Dual Use of Combustible Cigarettes and E-Cigarettes Among Socioeconomically Disadvantaged Adults Enrolled in a Smoking Cessation Trial	Nathalia Machado
P2 - 9	#246	Attitudes and perceptions around, and preferences for, disposable types versus other vapes	Catherine Kimber
P2 - 10	#25	E-Cigarette Use in Chile: A Convergent Mixed-Methods Study with Qualitative-Informed Survey Development on Social Normalization, Risk Perception, and Regulatory Gaps	Constanza Silva-Gallardo
P2 - 11	#250	Emerging dual use of smoked tobacco and e-cigarettes in Malaysia: Evidence from the Global Adult Tobacco Survey	Adriana Dragicevic
P2 - 14	#268	Distinct Functional Connectivity Profiles During Nicotine Cue Exposure in Young Adult Vapers and Smokers	Kanwar Boparai
P2 - 14	#288	Mental Health Outcomes Following Electronic Cigarette Discontinuation	Jana Roehr

Clinical populations			
P2 - 15	#121	Patient Engagement in a Mobile Smoking Cessation Program in Perioperative Care	Arlette Chavez Iniguez
P2 - 16	#284	Pilot of enhanced smoking cessation support for adults taking part in the Lung Cancer Screening programme in the North East of England.	Rachel McIlvenna
P2 - 17	#311	Mental Health and tobacco use in cancer prevention: an umbrella review of research trends	Daphné Desmoriaux
P2 - 18	#314	Understanding the Association Between Smoking Status and At-Home Prostate Cancer Screening Engagement in an mHealth Intervention for Black Men	Jordan Neil
P2 - 19	#114	Adapting Tobacco Dependence Treatment for Patients with Cancer in Canada: Integrating Evidence, Lived Experience, and Implementation Consensus	Nadia Minian
P2 - 20	#119	E-cigarettes for tobacco harm reduction in older adults scheduled for a lung cancer screening test	Nancy Rigotti
P2 - 21	#19	Current approach to smoking cessation in COPD in a Croatian tertiary pulmonary hospital: the authority gap.	Jelena Ostojic
P2 - 22	#254	Feasibility and efficacy of screening, brief intervention, treatment initiation and referral to PROMote Smoking CEsation in Emergency Departments: the PROCEED pilot randomized controlled trial	Anne-Laure Philippon
P2 - 23	#297	Opt-Out Tobacco Treatment in Practice: A Qualitative Analysis of Counseling Strategies That Maximize Tobacco Treatment Acceptance	Tresza Hutcheson
P2 - 24	#52	Smoking among Arab physicians: professional responsibility, barriers and cultural norms	Samira Obeid
P2 - 25	#57	Sex determinants of smoking cessation among smokers with arterial hypertension attending cessation services: a nationwide cohort study	Anne Laurence Le Faou
Priority populations			
P2 - 26	#55	Smoking cessation outcomes of unemployed smokers in real-world clinical settings in France	Anne Laurence Le Faou
P2 - 27	#122	An intervention to support smoking reduction in shelters and transitional housing : mixed-methods evaluation of TAPREOSI toolkit	Solenne Bonnetterre
P2 - 28	#160	Associations of smoking status with perceived social support among people with visual impairment	Erika Matsuda
P2 - 29	#178	Countering tobacco disinformation in U.S. Black communities: Selection of a campaign concept	Andrea Villanti
P2 - 30	#187	Effectiveness of Tailored Smoking Cessation Support Compared with Standard Care among Indigenous Peoples: A Systematic Review and Meta-Analysis of Randomized Controlled Trials	Salma Mahmoodianfard
P2 - 31	#212	Strategies to increase smoking cessation rates among people experiencing homelessness: a Scoping Review.	Bertrand Redonnet
P2 - 32	#259	« TABAPSY » : Initial findings and lessons learned from the pilot study and evaluation of a smoking cessation program in outpatient psychiatry	Isabelle Maillard

P2 - 33	#278	Examining the Relationship between Loneliness and Nicotine/Tobacco Product Use Behaviors in U.S. Black and Latinx Young Adults	Jeannie Garmon
P2 - 34	#292	Tobacco and Nicotine use among the Bedouin population in the Negev in Israel	Amal Khayat
P2 - 35	#53	Evaluation of the process, effects and costs of the SAMURAI participatory intervention for smoking cessation among migrants attending PASS clinics in Île-de-France (The SAMURAI 2 Study protocol)	Issifou Yaya
P2 - 36	#7	Transition Patterns of Dual Use of Cigarettes and E-cigarettes among Pregnant Women: A Latent Transition Analysis of PATH Study Data	Xiaozhong Wen
P2 - 37	#84	A behaviour change approach to tailoring smoking cessation interventions for substance use treatment services	Zoe Swithenbank
P2 - 38	#99	Implementing a Smoking Cessation Service in Routine and Manual Workplaces: A Qualitative Service Evaluation	Amelia Talbot
Smoking cessation			
P2 - 39	#285	Changes in the population seeking support for tobacco cessation: patterns and implications for treatment	Peter Selby
P2 - 40	#112	Improving an old treatment: dosing and titration of Nicotine Replacement Therapy	Scott Veldhuizen
P2 - 41	#249	Baseline IgG1 Levels as a Candidate Predictive Biomarker of NFL-101 Efficacy in Smoking Cessation: A Post-hoc Analysis of the CESTO2 Phase II Randomized Controlled Trial	Yannick Plétan
P2 - 42	#263	Readiness to Quit as a Predictor of Smoking Cessation: Evidence from The Botswana Smoking Abstinence Reinforcement Trial	Selebaleng Vinoliah Mokonopi
P2 - 43	#269	What Drives Engagement in Text-Based Smoking Cessation Intervention?	Victoria Chavez Uceda
P2 - 44	#272	Examining changes in smoking behavior and attitudes following a novel decision aid intervention combined with counseling	Scott Strayer
P2 - 45	#277	Determinants of Long-Term Smoking Abstinence in Canada: Insights from A Re-Engagement Survey	Terefe Gelibo
P2 - 46	#240	Insights of Users' Experience of the National Tobacco Dependence Service in England: A Qualitative Study	Maddey Patterson
P2 - 47	#38	Feasibility and Acceptability of Home-Based Transcranial Direct Current Stimulation Combined with Varenicline for Smoking Cessation	Kamrani Doray

POSTER SESSION 3
Tuesday 22nd 15:15 – 16:00
Cloisters gallery

Poster number	Abstract number	Title	Presenter
Policy			
P3 - 1	#304	Public Perception and Acceptability of Tobacco Control Policies in South Korea (2023–2025): Focusing on E-Cigarettes, Flavored Tobacco, and Pricing	Seungwon Shin
P3 - 2	#168	Tobacco Industry CSR activities in Poland in the years 2019-2024	Paulina Dera
P3 - 3	#164	A systematic review and synthesis of qualitative research on stakeholder views on commercial tobacco endgame goals and policies	Coral Gartner
P3 - 4	#166	Messaging a TobaccoFree Future: A Scoping Review of Endgame Communication Strategies	Coral Gartner
P3 - 5	#167	Documenting smoking regulations in municipalities – A Mapping Analysis of Smoke- and Aerosol- Free Policies in the Northern Region of The Netherlands	Kathleen Gali
P3 - 6	#16	Money and Murder: Prosecuting Tobacco Companies for Homicide to Bring About the Tobacco Endgame	Frankie Berardi
P3 - 7	#17	Challenges to Applying the Criminal Law to the Tobacco Endgame: A Comparative Analysis of Divergent Legal Systems in Europe and Australia	Frankie Berardi
P3 - 8	#18	Unpacking Cigarette Packaging: An Analysis of Tobacco Industry Documents	Timothy Dewhirst
P3 - 9	#181	Trust in Government and Public Support for Tobacco Endgame Policies: Evidence from Black Americans	Kymberle Sterling
P3 - 10	#193	Support for Tobacco Control Policies and Associations with Smoking Harm Perceptions among US Adults who Smoke and Youth	Melissa Mercincavage
P3 - 11	#205	A Kuhnian Analysis of Nicotine and Tobacco Research	Joe Gitchell
P3 - 12	#29	Enhancing Sustainability in EU Joint Actions - Novel Evaluation Approaches from JA-SAFE	Diana Paegle
P3 - 13	#89	Greater Tobacco Control Policy Implementation Is Linked to Lower Use and NCD Mortality: Results from EPOCHA-RF 2 Study	Marine Gambaryan
Population level interventions			
P3 - 14	#232	Examining the retail display and marketing of nicotine products in Scotland: discreet observations of outlets and interviews with retailers	Allison Ford
P3 - 15	#218	Prevalence and correlates of home smoking, smoking rules or policies, and support for multi-unit housing smoking ban: Findings from the 2024 International Tobacco Control Four Country Smoking and Vaping Survey	Germaine Lai
P3 - 16	#239	Mental models shaping the implementation of nicotinefree school hours: A qualitative study in Dutch secondary schools	Mirte (M.A.G.) Kuipers

P3 - 17	#247	Tobacco advertising, promotion and sponsorship (TAPS) exposure in three WHO Western Pacific countries: Evidence from repeated Global Adult Tobacco Surveys	Adriana Dragicevic
P3 - 18	#26	Trends in tobacco product retail availability between 2023-2025: A multi-city retailer assessment study in the US	Daniel Giovenco
P3 - 19	#264	The impact of non-tax pricing policies on smoking behaviour and the tobacco market: a narrative synthesis systematic review	Merve Narta
P3 - 20	#266	Estimating the Effect of a Low Nicotine Standard in Eight European Countries Using Aggregate Target Data	Merve Narta
P3 - 21	#54	Prevalence of cannabis use before and in the early period following partial legalisation in Germany	Daniel Kotz
P3 - 22	#201	Impact of the 2017 Excise Tax on Tobacco Use in the United Arab Emirates: A Repeated Cross-Sectional Analysis from the UAE Healthy Future Study.	Manal Alblooshi
P3 - 23	#87	Understanding the Swiss tobacco and nicotine market through national product notifications	Luc Lebon
Smoking cessation			
P3 - 24	#154	Remote Contingency Management for adherence to smoking cessation treatment: pilot clinical trial	Erica Cruvinel
P3 - 25	#175	Feasibility of Integrating Ecological Momentary Assessment, Wearable Sleep Monitoring, and Remote Biochemical Verification in Smoking Cessation: Fully Remote Pilot Study	Karen Ra
P3 - 26	#177	Reduced-nicotine cigarettes for smoking cessation and reduction: a Cochrane Review	Jonathan Livingstone-Banks
P3 - 27	#21	Estimating uptake and effectiveness of cytisine for smoking cessation in clinical practice in England	Dimitra Kale
P3 - 28	#210	Epidemiological, clinical, and smoking profile of smokers seeking cessation assistance in a cessation clinic in Tunisia	Yosr Ayedi
P3 - 29	#211	Comparative profile of smokers by gender attending a smoking cessation clinic in Ariana, Tunisia	Chahida Harizi
P3 - 30	#213	Profiles and causes of patients lost to follow-up in smoking cessation: the experience of the Abderrahman Mami Hospital Center, Ariana – Tunisia	Chahida Harizi
P3 - 31	#219	Targeting Neuroinflammatory Pathways in Nicotine Dependence: Rationale and Design of the TONIC Seamless Phase I/II Trial of NFL-102 for Smoking and Nicotine Cessation	Yannick Plétan
P3 - 32	#221	Remote carbon monoxide validation: Lessons from a randomised stop-smoking trial	Dunja Przulj
P3 - 33	#139	Under used or unheard of? Uptake of Cytisine and service user experiences in East London, UK.	Daniella Ladmore
P3 - 34	#296	Delivering an integrated digital cessation intervention for Health and Social Care staff who are tobacco dependent in the North East and North Cumbria, England	Rachel McIlvenna
P3 - 35	#56	Characteristics of users of French smoking cessation services from 2004 to 2018	Anne Laurence Le Faou

Youth			
P3 - 36	#245	Reduced Craving Mediates Varenicline's Effect on Youth Nicotine Vaping Cessation	Cori Cather
P3 - 37	#134	Empowering Youth Against Tobacco Industry Interference: A global collaborative approach	Mia El Osta
P3 - 38	#203	Perceptions of emerging nicotine products among Polish adolescents: the role of marketing and everyday contexts.	Julia Nowicka-Janik
P3 - 39	#22	At risk from the start? Can reasons for first time use predict youth's current vaping status?	Jason Hofman
P3 - 40	#230	Perceptions, Susceptibility to, and Use of Smart Vape Devices among Young Adults	Lisa Fucito
P3 - 41	#238	Testing the Effects of Oral Nicotine Products on Reducing Combustible Cigarette Use in Young Adults: A Pilot Study	Rachel Cassidy
P3 - 42	#276	School bullying and tobacco use among vulnerable Parisian adolescents: Findings from the VAVISA pilot study	Fabienne El-Khoury
P3 - 43	#281	Beyond Self-Report: Linking County-Level Commercial Cigar Tweet Rates to Tobacco and Cannabis Initiation Among US Youth and Young Adults	Ganna Kostygina
P3 - 44	#291	Young Adult Engagement in Tobacco Control: Insights from the Student-led Side-Program at the 3rd AGILE Conference	Karolina Cieścińska
P3 - 45	#295	Examining the Complex Relationships between Discrimination and Cigar Use Behaviors among U.S. Black and Hispanic Young Adults	Craig S. Fryer
P3 - 46	#35	Title: Attentional Bias and Craving Predict Distinct State-Dependent Neural Responses to Nicotine Cues in Young Adult Vapers but Not Smokers	Kameron Iturralde
P3 - 47	#71	Transgenerational consequences of grandparental smoking habits on grandchildren's development	Suci Ratih
P3 - 48	#82	How do we reach young target audiences for addiction research? Insights from an online study on shisha consumption	Cynthia Fedler

Wednesday, 23rd September, 2026

	Amphithéâtre Bilsky-Pasquier	Amphithéâtre Roussy	Amphithéâtre Farabeuf
08:00–09:00	Arrival / Registration / Hang posters for session 4		
09:00–09:50	Keynote lecture Amphithéâtre Farabeuf Cristina Martínez <i>Chair: Amanda Farley</i> <i>Keynote title: Why Evidence Is Not Enough: Making Smoking Cessation Happen in Hospital Care</i>		
10:00–11:15	Oral presentations Dual use and harm reduction <i>Chair: Ron Borland</i> Characterising dual use as a continuum of cigarette reduction and e-cigarette substitution: implications for harm reduction <i>Nikki Nollen</i> Using oral nicotine pouches to quit or reduce other nicotine and tobacco products: A qualitative study among U.S. adults <i>Christina N. Kyriakos</i> The effect of regular vs occasional e-cigarette use on cigarette reduction amongst continuing daily smokers <i>Katie Myers Smith</i> Trends in Ever and Current Nicotine Pouch Use Among U.S. Adults Using Commercial Tobacco Products, 2021–2024 <i>Ashley L. Merianos</i> Evaluating Concerns about Adverse Behavioural Effects of Dual Use in the Population Assessment of Tobacco and Health (PATH) Longitudinal Survey <i>Lynne Dawkins</i>	Oral presentations Population level tobacco and nicotine use patterns, trends and determinants <i>Chair: Sarah Jackson</i> Nicotine product use among youth and young adults in Aotearoa New Zealand: Findings from the ITC Youth Tobacco and Vaping Survey 2024 <i>Richard Edwards</i> Is it better to have tried and failed to quit smoking with e-cigarettes or to have never tried e-cigarettes at all? Longitudinal findings from the US Population Assessment of Tobacco and Health Study <i>Elias Klemperer</i> Beyond Prevalence: Trends in Monthly Nicotine Product Consumption Among U.S. Young Adults, 2013–2023 <i>Kenneth Warner</i> The Smoking Legacy: How Three Generations of Tobacco Use Shape Grandchildren’s Habits <i>Suci Ratih</i> Projecting the end of the tobacco epidemic. Regional disparities in prevalence trajectories to 2040 <i>Hasan Jamil</i>	Symposium Ten years of strengthening primary care support for tobacco cessation in North Macedonia (2016 – 2026): From Evidence to Policy <i>Discussants: Katarina Stavric and Sian Williams</i> Building Primary Care Capacity to Treat Tobacco Dependence: Experience from the Global Bridges Project in North Macedonia <i>Elizabeta Kostovska</i> Randomised controlled trial of brief smoking cessation interventions in primary care in North Macedonia (BreatheWell) <i>Amanda Farley</i> Strengthening the Healthcare System Response to Tobacco Cessation in North Macedonia <i>Sashka Janevska</i> Community Engagement and Policy Dialog in Advancing Tobacco Control Legislation in North Macedonia <i>Aleksandra Stamenova</i>

Wednesday, 23rd September, 2026

	Amphithéâtre Bilsky-Pasquier	Amphithéâtre Roussy	Amphithéâtre Farabeuf
11:15–12:00	Coffee break / Poster session 4		
12:00–12:50	Keynote lecture Amphithéâtre Farabeuf Tessa Langley <i>Chair: Sarah Jackson</i> <i>Keynote title: Beyond Health: The Economic and Equity Implications of Tobacco and Vaping Policies</i>		
13:00–14:00	Lunch Meet the Editors – Drop in to ask questions about publishing in Nicotine and Tobacco Research Journal <i>Caitlin Notley, Editor in Chief with Deputy Editors</i>		

Programme

Wednesday, 23rd September, 2026

14:00–15:15	Symposium Emerging Nicotine Products: Linking Formulation, Delivery, and Early Biological Effects <i>Discussant: Tobias Ruether</i> The Evolving Nicotine Product Landscape: A Comparative Framework <i>Andrea Rabenstein</i> Influence of Nicotine Pouch pH on Plasma Nicotine Kinetics: A Four-Arm Crossover Study <i>Ariel Turcios</i> Nicotine Pharmacokinetics, Puffing Behavior, and Product Appeal of Flavoured Non-Tobacco Heated Products Compared with Cigarettes and Heated Tobacco Products <i>Annika Mahnke</i> Cardiovascular and Pulmonary Responses to Emerging Nicotine Products <i>Klaas Frederik Franzen</i>	Oral presentations Smoking in Pregnancy: Policies, Interventions and Maternal–Infant Outcomes <i>Chair: Ivan Berlin</i> Qualitative evaluation of the English National Smoke-free Pregnancy Incentives Scheme (NSPIS) <i>Michael Ussher</i> Associations between maternal e-cigarette use during pregnancy and infant mortality in the first 6 months of life <i>Xiaozhong Wen</i> Financial incentives for maintaining postpartum smoking abstinence: 3–4-year follow-up of the FIPPS randomized controlled trial <i>Michael Ussher</i> The association of maternal smoking during pregnancy with the risk of neonatal intensive care unit admission among full-term infants <i>Mikael Ekblad</i> Assessing the effect of the smokefree generation policy in England on smoking in pregnancy <i>Nathan Davies</i>	Symposium Current issues in the design and implementation of smoking cessation clinical trials <i>Discussant: Nikki Nollen</i> The Challenge of Addressing Real-World Tobacco, Nicotine, and Cannabis Use Patterns in Smoking Cessation Trials <i>Megan Piper</i> Early treatment response in black adults receiving pharmacotherapy for smoking cessation: implications for clinical trial design <i>Elly Leavens</i> Reconsidering the rationale for following continuing smokers in clinical trials: analysis of relapse and quitting after pharmacotherapy <i>Lisa Sanderson Cox</i> Including pharmacogenomics in clinical trials may improve use of resources and outcomes. <i>Rachel Tyndale</i>
15:20–16:00	Closing ceremony and prizes Amphithéâtre Farabeuf		

POSTER SESSION 4
Wednesday 23rd 11:15 – 12:00
Cloisters gallery

Poster number	Abstract number	Title	Presenter
E-cigarettes			
P4 - 1	#301	Prevalence of e-cigarette use among women of reproductive age	Cristina M. Posse
P4 - 2	#306	Attitudes and Perceptions Toward Tobacco and E-Cigarettes: What Differences Between Men and Women?	Anne-Fleur Guillemain
P4 - 3	#60	Comparing Mental Health and Sexual Function in Dual Users of E-Cigarettes and Conventional Cigarettes in Malaysia	Anne Yee
P4 - 4	#64	Flavor composition of e-liquids before and after vaping - Bypassing the Dutch flavor ban	Walther Klerx
P4 - 5	#67	Engaging Patients with Lived Experience in a Randomized Controlled Trial Exploring Cytisine and E-Cigarettes for Smoking Harm-Reduction	Jessica Zhang
P4 - 6	#95	Exploring the implementation of the Swap to Stop initiative to advance smoking cessation efforts in England: A qualitative case study	Gemma King
Harms			
P4 - 7	#12	Mortality attributable to second-hand tobacco smoker exposure in Israel	Yonatan Amir
P4 - 9	#186	Same Cigarette, Different Story: Naturalness Descriptors Reduce Harm Expectancies and Alter Subjective Effects in a Human Lab Study	Jennifer Pearson
P4 - 9	#192	Health information preferences for cannabis, nicotine, and co-use: A qualitative study of UK young adults with anxiety/depression symptoms	Matilda Nottage
P4 - 10	#197	Second-hand Smoke Exposure and Hypertension: A Systematic Review and Meta-Analysis	Javad Heshmati
P4 - 11	#253	Associations Between E-cigarettes, Cardiorespiratory Fitness, and Physical Activity: A Systematic Review and Meta-Analysis	Javad Heshmati
P4 - 12	#233	Disposable E-Cigarettes: The Effect of Flavors on Carbonyl Emissions	Ariel Turcios
P4 - 13	#255	Snus Use and Cardiometabolic Health Markers Among Older Adults: A Population-Based Longitudinal Study in Sweden	Yuxin Wang
P4 - 14	#256	Health effects of vaping in adults and pregnancy-related exposure: a structured weight-of-evidence assessment	Carole Leroux

Digital/Media			
P4 - 15	#133	Strengthening implementation of anti-tobacco media campaigns: Insights from the 2025 Global Progress Report on Implementation of the WHO FCTC	Camille Martin
P4 - 16	#173	Development of an app for a Cognitive-Behavioral Smoking Cessation Intervention	Jorge Vacas Garcia
P4 - 17	#215	Your rights versus my rights: Media representation of smoking and second-hand smoke in homes, 2015–2024	Germaine Lai
P4 - 18	#261	‘Microdosing the Patch’: Examining off-label nicotine patch use and nicotine benefit discussions on TikTok	Chandler Carter
P4 - 19	#74	Engaging Users in Quit Date Goal Setting for Smoking Cessation in Mobile Formats	Aisling Marken
P4 - 20	#97	Smoke Gets in Your Eyes: Typology of Smoking Protagonists in Modern Prestige Cinema	Daniel Amir
P4 - 21	#169	User-Centered Design of a Smoking Cessation Mobile App: Qualitative Findings From the Development Phase	Lois Millara
Novel nicotine products			
P4 – 22	#237	Beyond cigarettes: The dual use of E- Cigarettes & Nicotine pouches by University students.	Denise Proudfoot
P4 – 23	#274	“Designed for the seasoned user”: Examining discussion and promotion of high-strength and moist nicotine pouches on TikTok	Chandler Carter
P4 – 24	#34	Harm reduction beliefs sustain nicotine pouch use: A cross-sectional survey of current and former oral nicotine pouch users	Melissa Little
P4 – 25	#44	Nicotine Pouch Brands and Online Sentiment: Insights from Reddit to Advance Tobacco Endgame Strategies	Yulin Hswen
P4 – 26	#61	Nicotine pouch use in Germany: Low prevalence but increasing awareness in repeated nationally representative cross-sectional surveys (2021-2025)	Stephanie Klosterhalfen
Population level interventions			
P4 – 27	#91	Cigarette health warning label compliance in Nigeria: A multi-city observational study	Oluwatomi Funbi Owopet
P4 – 28	#303	Monitoring compliance with a national comprehensive tobacco marketing ban in Mexico	Kai Wasson
P4 – 29	#308	The impact of pack characteristics on product choice: A discrete-choice experiment with adult current nicotine users in the UK	Georgia Alexandrou
P4 – 30	#117	Examining Consent to Harms Due to Tobacco in British Common Law Countries and the Role of Addiction	Frankie Berardi
P4 – 31	#128	Testing a Continuum of Risk Graphic with Adults Who Smoke Daily: A Pilot Study	Emily Hackworth

P4 – 32	#129	The Effect of Usual Brand Packaging on Perceptions of Very Low Nicotine Content Cigarettes and Behavioral Intent: A Pilot Study	Emily Hackworth
P4 – 33	#143	Attitudes on smoke-free and aerosol-free environments at a university medical center in Germany	Marie Charlotte Friberg,
P4 – 34	#23	Inequities in the compliance of court-ordered point-of-sale tobacco industry corrective statements, USA	Amanda Kong
P4 – 35	#24	Identifying barriers and facilitators to the implementation of zoning policies to equitably reduce neighborhood tobacco retailer availability, Oklahoma, USA	Amanda Kong
P4 – 36	#145	Interactions Between Minimum Age of Sale and Youth Purchase, Use, and Possession (PUP) Laws: Evidence from the U.S. and Implications for the EU	Andrea Milstred
P4 – 37	#149	Individual and neighborhood correlates of real-time tobacco purchases in areas with flavored sales restrictions	Shyanika Rose
P4 – 38	#49	Menthol flavor enhancer use and willingness to buy under a menthol cigarette ban	Mayank Sakhuja
P4 – 39	#161	Anticipated behavioural responses to increased travel time to purchase tobacco: Findings from the 2016-2024 International Tobacco Control Four Country Smoking and Vaping Surveys	Coral Gartner
Population trends			
P4 – 40	#172	Smoking and vaping among young people in England by age, gender, family smoking and family attitudes to smoking	Nicole Nwalema
P4 – 41	#183	Cigarillo Brand and Influencer Engagement on Social Media and Use Patterns Among Black and Latino Young Adults in the United States	Charity Ntansah
P4 – 42	#184	Prevalence and demographics of non-cigarette tobacco product use among adults who smoke and/or vape in England: Findings from the ITC 2024 England Survey	Tharinee Thevanathasarma
P4 – 3	#273	Nicotine and tobacco product use among priority populations in New Zealand	Rachel Denlinger-Apte
P4 – 44	#283	Predictive Tobacco Use Behaviors: An AI-Driven Approach Using the PATH Study Data	Zidian Xie
P4 – 45	#63	A Nationally Representative Repeated Cross-Sectional Study of 10-year Substance Use Trends among Culturally and Linguistically Diverse Australians	Yan Yee Lee
P4 – 46	#73	US Adults’ Shift Away from Exclusive Smoking: Quarterly Trends in Tobacco/ Nicotine Use Behaviors and Estimated Reduction in Population-Level Exposure, 2014-2024	Sooyong Kim
P4 – 47	#88	Prevalence and correlates of smoking and vaping among 11–15-year-old school pupils in England	Adama Fullah

Notre-Dame Cathedrals grotesques and the Eiffel Tower

About Paris

Paris is a world in itself. Each of its neighborhoods feels like a different country waiting to be explored, from Montmartre to the Latin Quarter, passing iconic landmarks such as Notre-Dame Cathedral, the Eiffel Tower, the Arc de Triomphe, the Champs-Élysées, and the Jardin des Plantes. Every stone tells a story of art and culture, from the Louvre Museum to the futuristic Louis Vuitton Foundation. Paris is also a celebration of gastronomy and creativity, something chefs like Alain Ducasse and Pierre Hermé would certainly agree with. (<https://www.france.fr/en/destination/paris/>)

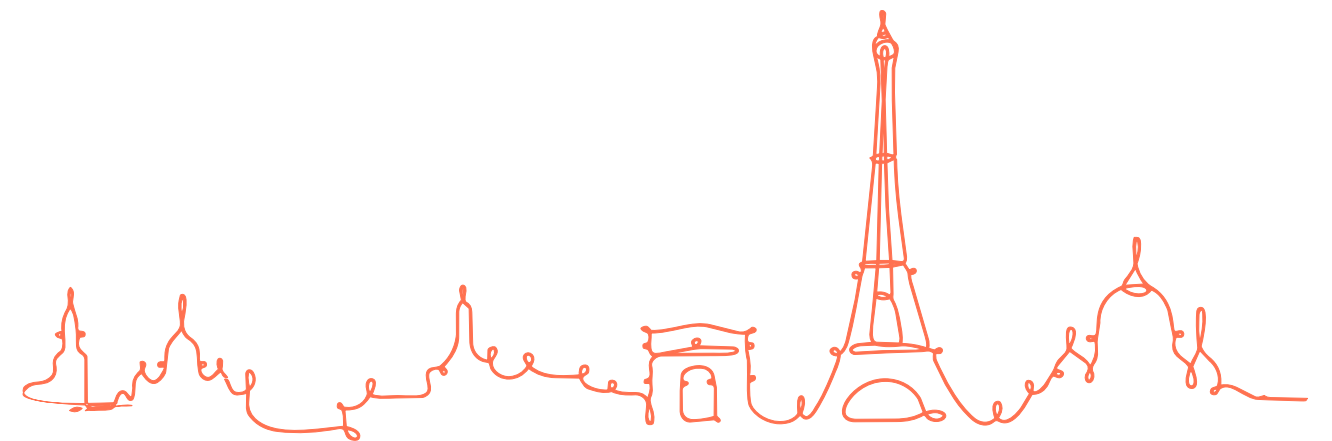

Nestled in the heart of Paris's historic 6th arrondissement, the [Cordeliers campus](#) of Sorbonne University places conference attendees within walking distance of some of the city's most iconic landmarks. Just beyond the campus, visitors can stroll through the charming streets of [Saint-Germain-des-Prés](#), explore the riverside bookstalls along the [Seine](#), or admire the grandeur of [Notre-Dame Cathedral](#) and the nearby [Panthéon](#).

Main walking distances from the campus:

- [Odéon](#) (about 3 min)
- [Sorbonne](#) (5–7 min)
- [Musée de Cluny](#) (5 min)
- [Notre-Dame Cathedral](#) (10–15 min)
- [Conciergerie](#) (15–20 min)

The location also provides easy access to major cultural sites. The [Louvre Museum](#) is a short walk or metro ride away, as well as the [Luxembourg Gardens](#) and the Seine riverbanks.

A nearby historic restaurant is [Bouillon Racine](#). It was formerly the canteen of Sorbonne University and is a well-known example of traditional Parisian dining.
